Eisenhower Matrix:

	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Load historical data from a CSV file into Java objects. ● Calculate metrics per stock like total % average annual return, volatility ● Let the user choose a goal: short term or long term ● Compare 2 or more stocks ● Ranks results with an explanation of why each stock fits the goal ● Basic input validation ● Unit tests for metric valuations.	**Schedule - (For V2.0+)** ● Asking about Risk tolerance ● Price history charts ● GUI
Not Important	**Delegate - (Use a library)** ● Use a CSV parsing library ● Use a charting library ● Download a ready made historical dataset on Kaggle or Yahoo finance.	**Delete - Cut it** ● AI/ML stock prediction ● Mobile app ● Personalized financial advice ● Crypto ● Live trading
